

Problem 4 - Frames II

Determine the horizontal and vertical components of the force at C which member ABC exerts on member CEF.

$$\begin{aligned} \sum M_B &= 0 \\ 3'(E_y) + 6'(300) &= 0 \quad E_y = -600 \\ E_y &= 600 \text{ lbs } \uparrow \text{ on BED} \rightarrow \sum F_x = 0 \\ \sum F_y &= 0 \\ B_y - E_y - 300 &= 0 \\ B_y - 600 - 300 &= 0 \\ B_y &= 900 \text{ lbs } \uparrow \text{ on BED} \end{aligned}$$

$$\begin{aligned} B_y - E_y - 300 &= 0 \\ B_y - 600 - 300 &= 0 \\ B_y &= 900 \text{ lbs } \uparrow \text{ on BED} \end{aligned}$$

$$\begin{aligned} B_y - E_y - 300 &= 0 \\ B_y - 600 - 300 &= 0 \\ B_y &= 900 \text{ lbs } \uparrow \text{ on BED} \end{aligned}$$

NOW FBD ABC

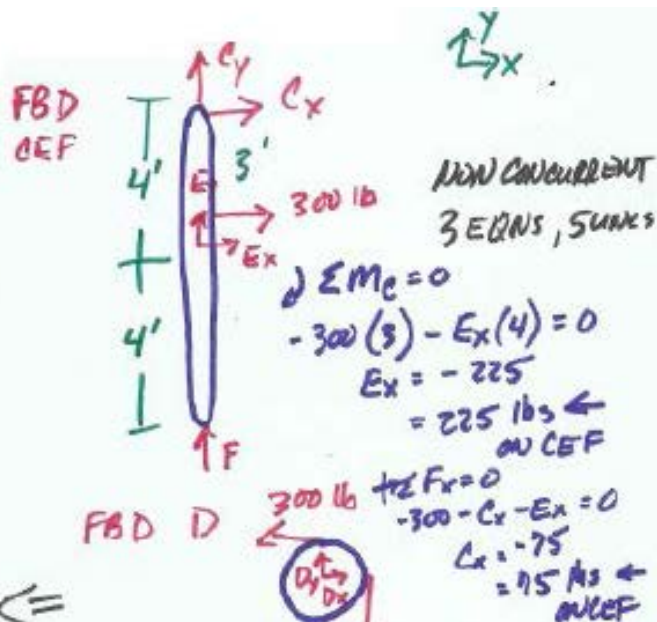

NON CONCURRENT

$$\begin{aligned} \sum M_A &= 0 \\ -3(300) - 4(75) + 6C_y + B(75) &= 0 \\ C_y &= 100 \text{ lbs } \downarrow \text{ on ABC} \end{aligned}$$

SO

$$\begin{aligned} C_y &= 100 \text{ lbs } \uparrow \\ C_x &= 75 \text{ lbs } \leftarrow \text{ on CEF} \end{aligned}$$

FBD D

CONCURRENT

2 EQNS, 2 UNKS

$$\begin{aligned} D_y &= 300 \text{ lbs } \uparrow \text{ on PULLEY} \\ D_x &= 300 \text{ lbs } \rightarrow \text{ on PULLEY} \end{aligned}$$
