

Problem 3 – Internal Forces II

Determine the normal force, shear force, and moment at sections passing through points *E* and *F*. Member *BC* is pinned at *B* and there is a smooth slot in it at *C*. The pin at *C* is fixed to member *CD*.

Using BC

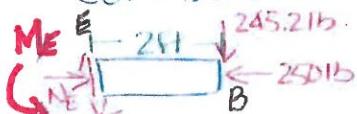

$$\nexists \sum M_B = 0 = (\frac{1}{2} \cdot 3 \cdot 80)(2) - (500 \sin 60^\circ)(3) + SC_y$$

$$C_y = 307.8 \text{ lb } \uparrow \text{ on BC}$$

$$\nexists \sum F_y = 0 = B_y - (\frac{1}{2} \cdot 3 \cdot 80) - (500 \sin 60^\circ) + C_y \Rightarrow B_y = 245.2 \text{ lb } \uparrow \text{ on BC}$$

$$\rightarrow \nexists \sum F_x = 0 = B_x - (500 \cos 60^\circ) \Rightarrow B_x = 250 \text{ lb } \rightarrow \text{ on BC}$$

Cut AB @ E FBD EB  $\begin{smallmatrix} y \\ \nearrow \\ \searrow \\ x \end{smallmatrix}$

$$\sum F_x \Rightarrow N_E = 250 \text{ lb } \rightarrow \text{ on EB}$$

$$\sum F_y \Rightarrow V_E = 245.2 \text{ lb } \uparrow \text{ on EB}$$

$$\nexists \sum M_E = 0 = (245.2)(2) - M_E$$

$$M_E = 490 \text{ lb ft } \uparrow \text{ on EB}$$

Cut CDE @ F FBD CE  $\begin{smallmatrix} y \\ \nearrow \\ \searrow \\ x \end{smallmatrix}$

$$\sum F_x \Rightarrow N_F = 0$$

$$\sum F_y \Rightarrow V_F = 307.8 \text{ lb } \uparrow \text{ on LF}$$

$$\nexists \sum M_F = 0 = M_F - 4(307.8)$$

$$M_F = 1231 \text{ lb ft } \uparrow \text{ on CF}$$
